

	Arrays	LinkedList
get	$O(1)$	at position $n/2$ $O(n)$
set	$O(1)$	at position $n/2$ $O(n)$
getSize	—	$O(1)$
insert Front	—	$O(1)$

## ArrayList

This is how I use the list → [3, 5, 8, 13]

insertLast(3)  
 insertLast(5)  
 insertLast(8)  
 insertLast(13)  
 insertLast(21)

When the ArrayList fills up, we will replace the array.
